THE RENDON CENTER FOR DERMATOLOGY & AESTHETIC MEDICINE

880 N.W. 13th St., Suite 3C, Boca Raton
561/529-0544 • drrendon.com

It's not difficult to find dermatologists in Boca Raton. It is difficult to find dermatologists with the knowledge, experience and accomplishments of Dr. Marta I. Rendon and her colleagues, Dr. Chere Lucas Anthony and Dr. Andrea Chen.

Dr. Rendon, who founded the Rendon Center for Dermatology & Aesthetic Medicine in 1999, is a double

board-certified physician who not only handles all of the dermatologic needs of her patients (including the treatment of hair and nail disorders) but also brings cutting-edge care to Boca Raton.

"We have a very unique practice," says Dr. Rendon, who has been on the forefront of cosmetic dermatology for more than 25 years. "We not

only do general dermatology and aesthetic medicine, but we also have a big division that does research. Being involved in research with the pharmaceutical industry allows our patients to become familiar with many new treatments and technologies. Dr. Rendon has been involved in clinical trials of new products for acne, rosacea, psoriasis, and cosmetics and is an international physician trainer who instructs other dermatologists on the latest techniques.

If you want ultimate skin health, come visit the teacher, not the student.

"We take pride in our results, whether it's medical or aesthetic. We are honest with our patients and tailor the best treatment program for them to ensure that their end result is the best result."

-Dr. Marta I. Rendon

Dr. Rendon's experience is complimented by the care her colleagues provide. Dr. Lucas Anthony is a general dermatologist specializing in skin cancer and acne. Dr. Andrea Chen is a Mohs Surgeon, who specializes in skin cancer removal. She also treats all types of general dermatology problems.
